Rack & Panel Blind Mating Modular Connectors NF F 61-032

Hypertac® Hyperboloid Technology

Smiths Interconnect offers an extensive range of superior contact technologies suitable for standard and custom solutions. Hypertac® (HYPERboloid conTACT) is the original superior performing hyperboloid contact technology designed for use in all applications and in harsh and demanding environments where high reliability and safety are critical. The inherent electrical and mechanical characteristics of the Hypertac hyperboloid contact ensures unrivalled performance in terms of reliability, number of mating cycles, low contact force and minimal contact resistance. The shape of the contact sleeve is formed by hyperbolically arranged contact wires, which align themselves elastically as contact lines around the pin, providing a number of linear contact paths.

Features

Benefits

Low insertion/extraction forces

The angle of the socket wires allows tight control of the pin insertion and extraction forces. The spring wires are smoothly deflected to make line contact with the pin.

High density interconnect systems

Significant reductions in size and weight of sub-system designs. No additional hardware is required to overcome mating and un-mating forces.

Long contact life

The smooth and light wiping action minimizes wear on the contact surfaces. Contacts perform up to 100,000 insertion/extraction cycles with minimal degradation in performance.

Low cost of ownership

The Hypertac contact technology will surpass most product requirements, thus eliminating the burden and cost of having to replace the connector or the entire subsystem.

Lower contact resistance

The design provides a far greater contact area and the wiping action of the wires insures a clean and polished contact surface. Our contact technology has about half the resistance of conventional contact designs.

Low power consumption

The lower contact resistance of our technology results in a lower voltage drop across the connector reducing the power consumption and heat generation within the system.

Higher current ratings

The design parameters of the contact (e.g., the number, diameter and angle of the wires) may be modified for any requirement. The number of wires can be increased so the contact area is distributed over a larger surface. Thus, the high current carried by each wire because of its intimate line contact, can be multiplied many times.

Maximum contact performance

The lower contact resistance of the Hypertac contact reduces heat build-up; therefore Hypertac contacts are able to handle far greater current in smaller contact assemblies without the detrimental effects of high temperature.

Immunity to shock & vibration

The low mass and resultant low inertia of the wires enable them to follow the most abrupt or extreme excursions of the pin without loss of contact. The contact area extends 360° around the pin and is uniform over its entire length. The 3 dimensional symmetry of the Hypertac contact design guarantees electrical continuity in all circumstances.

Reliability under harsh environments

Harsh environmental conditions require connectors that will sustain their electrical integrity even under the most demanding conditions such as shock and vibration. The Hypertac contact provides unmatched stability in demanding environments when failure is not an option.

LHS Series

Coax or Power & Signal only

Smiths Interconnect LHS Series is a flat floating connector mixing power, signal and coaxial contacts. The LHS connectors have been designed to meet the most demanding requirements of the rail transportation industry and is qualified according to SNCF standards. They are ideal for rack & panel, cable and program applications.

The LHS connector range provides a quick and easy connection/disconnection and the float mounting enables to compensate mechanical misalignment up to 1.25mm during blind mating, ensuring an excellent signal integrity. The 14 units of 5.5m pitches allow a high contact density up to 70 signal contacts.

Made with the superior Hypertac® hyperboloid technology, these connectors offer excellent reliability, even under high levels of shock and vibration and maintain life cycle up to 500 mating cycles for a low cost of ownership.

**Railways
approved
flat mount
connectors**

Features & Benefits

Superior Design

- Flat float mount connector
- Guiding pins, ideal for blind mating
- Interchangeable male and female modules
- Rack/panel applications, (norm XPF61-005)
- Compliant with NF F 61-032 standards

Enhanced Functionality

- Easy cabling mounting, cabling process designed with R&D teams of main rolling stock manufacturers
- Designed for the use of standard existing crimp and positioner tools Hypertac® Hyperboloid Contact System
- Reduced cost of ownership through unrivalled contact performance and reliability
- Shock and vibration proofed
- High density up to 70 signal contacts
- Mixed power, signal and coaxial contacts

How To Order

1 Series	L [fixed]
2 Model	H [fixed]

LHZ Series

Mixed power, signal, coaxial and high speed contacts

Smiths Interconnect LHZ Series is a flat floating connector mixing power, signal, coaxial and high speed contacts, designed especially for the transmission of Ethernet high-speed signals required in harsh environment railway applications.

High speed contacts are available in Twinax, Triax and Quadrx versions. The inner contact uses the Hypertac® hyperboloid technology and offers excellent reliability, even under high levels of shock and vibration.

The contact system meets the requirements of Ethernet Class F (CAT 7). It is compliant with IEE802.3 and achieves more than 1.2 GHz. Cables of an impedance of 100, 120 and 150, and of sizes from 6.5 mm to 13 mm diameter can be used.

Designed for
the transmission
of Ethernet
high-speed signals

Features & Benefits

Superior Design

- Technology designed especially for the transmission of Ethernet high-speed signals required in harsh environment railway applications.
- Design combining the benefits of the hyperboloid technology with a ruggedised shell housing.
- Modular design; Twinax, Triax and Quadrx versions
- Performances meeting the evolutions of the railway industry requirements: signal frequencies of more than 1.2 GHz

Hypertac® Hyperboloid Contact System

- Reduced cost of ownership through unrivalled contact performance and reliability
- Shock and vibration proofed: use of the 1.02mm hyperboloid socket contact
- Mixed power, signal, coaxial and high speed contacts

Enhanced Functionality

- Ruggedised connector: 1 million balancing cycles testing
- Easy cabling mounting: cabling process designed with R&D teams of the main rolling stock manufacturers. Cables used 100, 120 or 150 Ω
- Male and female modules are interchangeable
Design for use of standard existing tools: crimp tool and positioner

Technical Characteristics

Electrical

Current rating	7.5 A
Contact resistance	< 3.5 mΩ
Withstanding voltage	2000 V

Mechanical

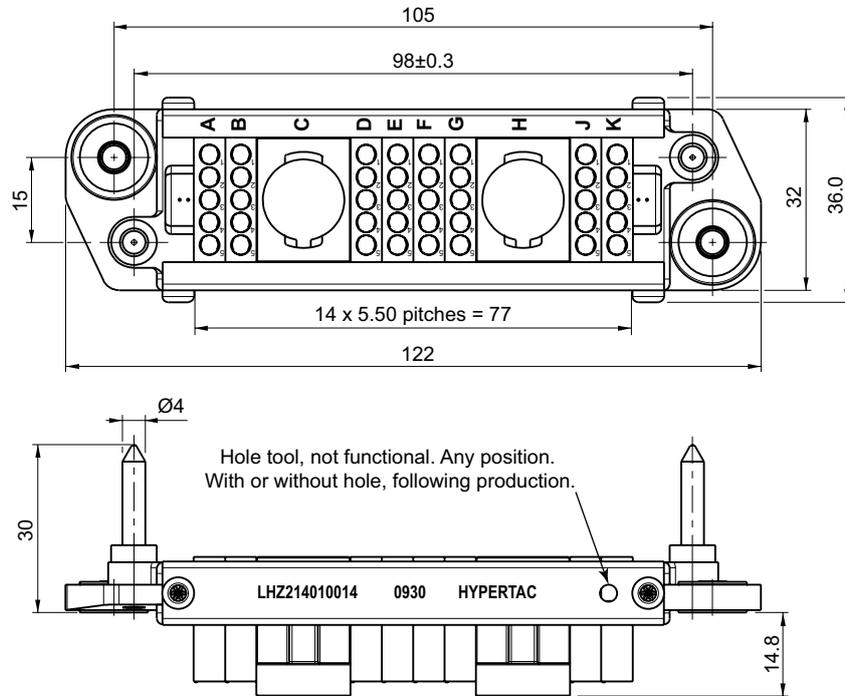

Contact rotation	70daN.cm
Contact retention	>250N
Contact pull	>250N
Mating cycles	>500 cycles

Environmental

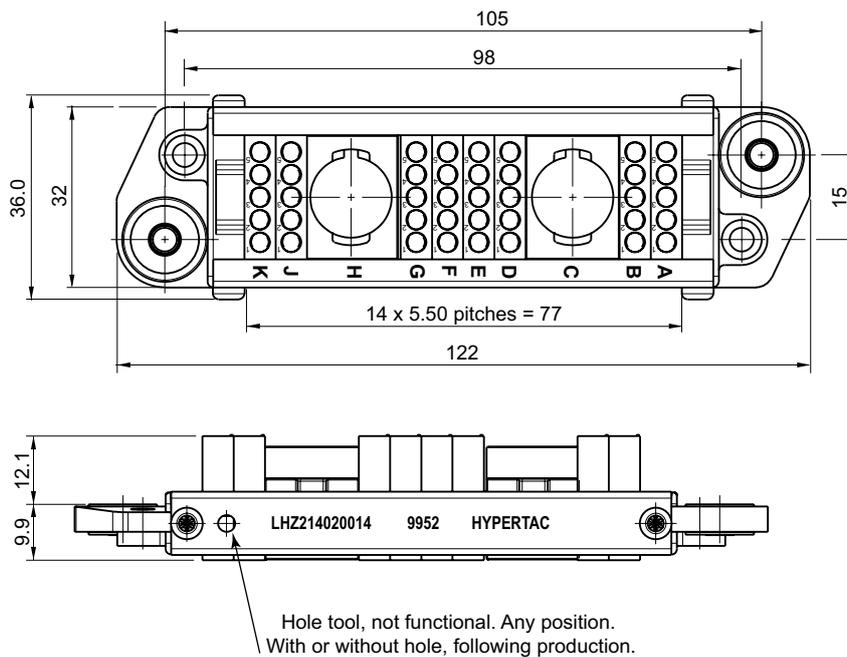

Dry heat	1000H at 100° C (standard value: 96H)
Temperature range	-55° C at +100° C, 5 cycles
Salt spray	96H (5% NaCl)
Damped heat	56 days (40° C 90/95% HR)
Fire and Smoke	According to NF F 16-101, NF F 16-102

2 x HDFH

Part number

Male plug: LHZ 214 01 00 14

Modules

8 x ZHA
2 x HDMH

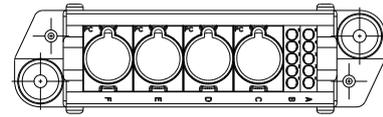

Part number

Female receptacle: LHZ 216 02 00 14

Modules

2 x ZHA
4 x HDFH

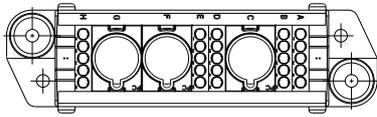

Part number

Male plug: LHZ 215 01 00 14

Modules

2 x ZHA
4 x HDMH

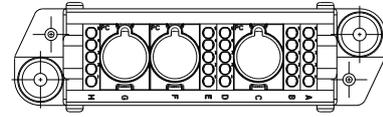

Part number

Female receptacle: LHZ 219 02 00 14

Modules

5 x ZHA
3 x HDFH

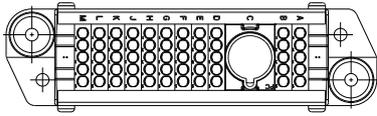

Part number

Male plug: LHZ 218 01 00 14

Modules

5 x ZHA
3 x HDMH

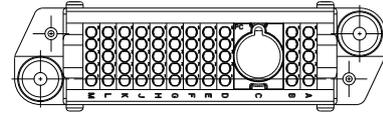

Part number

Female receptacle: LHZ 221 02 00 14

Modules

11 x ZHA
1 x HDFH

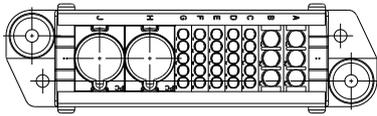

Part number

Male plug: LHZ 220 01 00 14

Modules

11 x ZHA
1 x HDMH

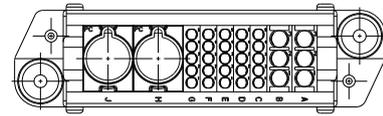

Part number

Female receptacle: LHZ 225 02 00 14

Modules

5 x ZHA
2 x HDFH
2 x SH

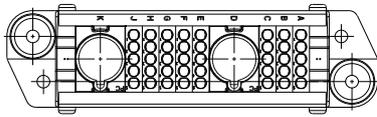

Part number

Male plug: LHZ 225 01 00 14

Modules

5 x ZHA
2 x HDMH
2 x SH

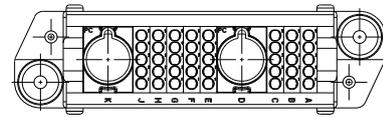

Part number

Female receptacle: LHZ 226 02 00 14

Modules

8 x ZHA
2 x HDFH

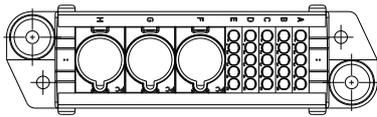

Part number

Male plug: LHZ 226 01 00 14

Modules

8 x ZHA
2 x HDMH

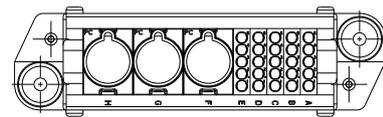

Part number

Female receptacle: LHZ 231 02 00 14

Modules

5 x ZHA
3 x HDFH

Part number

Male plug: LHZ 231 01 00 14

Modules

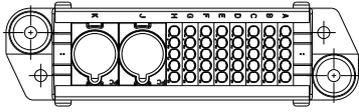

5 x ZHA
3 x HDMH

Note: Signal contacts must be ordered separately see page 7 and 8

Receptacles

Can be mating with

Plugs

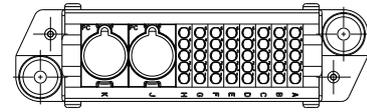

Part number

Female receptacle: LHZ 232 02 00 14

Modules

8 x ZHA
2 x HDFH

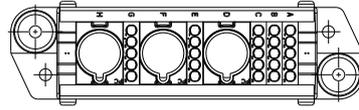

Part number

Male plug: LHZ 232 01 00 14

Modules

8 x ZHA
2 x HDMH

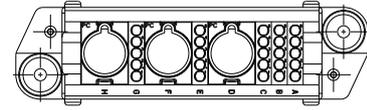

Part number

Female receptacle: LHZ 236 02 00 14

Modules

5 x ZHA
3 x HDFH

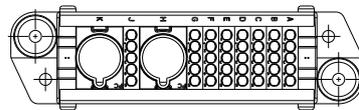

Part number

Male plug: LHZ 235 01 00 14

Modules

5 x ZHA
3 x HDMH

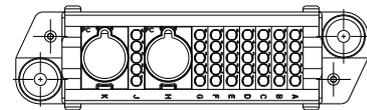

Part number

Female receptacle: LHZ 238 02 00 14

Modules

8 x ZHA
2 x HDFH

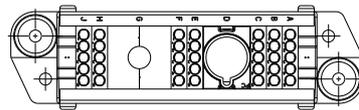

Part number

Male plug: LHZ 237 01 00 14

Modules

8 x ZHA
2 x HDMH

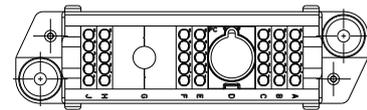

Part number

Female receptacle: LHZ 240 02 00 14

Modules

7 x ZHA
1 x HDFH
1 x VH

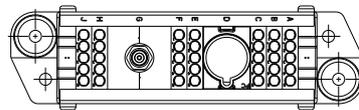

Part number

Male plug: LHZ 239 01 00 14

Modules

7 x ZHA
1 x HDMH
1 x VH

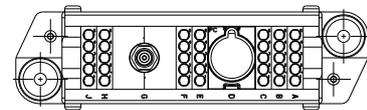

Part number

Female receptacle: LHZ 242 02 00 14

Modules

7 x ZHA
1 x HDFH
1 x VF

Coaxial contact with solder connection for cable KX15

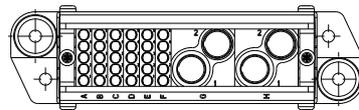

Part number

Male plug: LHZ 241 01 00 14

Modules

7 x ZHA
1 x HDMH
1 x VM

Coaxial contact with solder connection for cable KX15

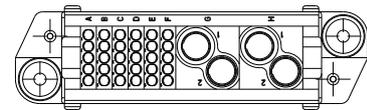

Part number

Female receptacle: LHZ 601 02 00 14

Delivered with the accessorie

Modules

6 x ZHA
2 x 2Twinax
L_183

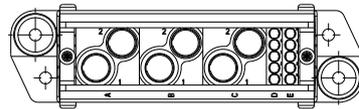

Part number

Male plug: LHZ 601 01 00 14

Modules

6 x ZHA
2 x 2Twinax

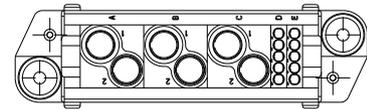

Part number

Female receptacle: LHZ 602 02 00 14

Delivered with the accessorie

Modules

2 x ZHA
3 x 2Twinax
L_183

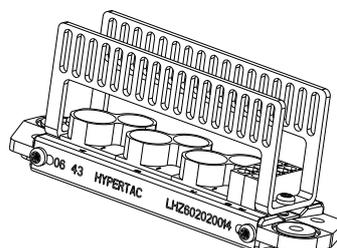

Part number

Male plug: LHZ 602 01 00 14

Modules

2 x ZHA
3 x 2Twinax

Example with L_183

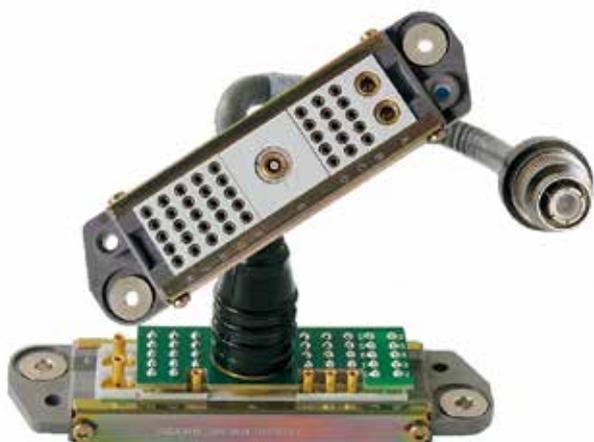

Note: Signal contacts must be ordered separately see page 7 and 8

LHZ Series *Rack & Panel connector incorporating antenna link for GPS or ERTMS transmissions*

**PCB embedded
within the connector**

The European Rail Traffic Management System (ERTMS) was originated by the European Community (EC) to create a unique Automatic Train Control and railways management system to enable interoperability throughout the European rail network. ERTMS is the combination of the new control-command system ETCS (European Train Control System) and the new GSM-R radio system for voice and data communication. The ERTMS project has been set up to ensure safe operation of the trains in the network and to deal with the traffic and infrastructure management issues enabling the optimisation of the capacity of the lines and the utilisation of the fleet. The ERTMS project involves six major suppliers in seven countries (UK, France, Spain, the Netherlands, Germany, Switzerland and Italy).

The project and solution itself represented a number of challenges as it needed to be retro-fitted to a wide variety of existing rolling stock and a unique identifier, used in conjunction with GPS tracking, was to be included. To meet these needs, Smiths Interconnect created the Nuloc custom connector. This uses Hyperboloid contact technology to achieve low contact resistance and robust electrical connection.

The device implements the identification function by integrating a recognition code on a printed circuit embedded within the connector receptacle. This code is programmed during the final manufacturing phase. The ERTMS interconnection system also integrates a coaxial cable assembly to link to the GPS/GSM-R antenna and each cable assembly must be dimensioned to the locomotive type. This is also done during the manufacturing process according to instructions specific to each order.

Like all connectors targeted for rail applications, strict governmental, EC and customer-specified standards exist, all of which must be met if not exceeded. These standards, such as the French NF F 61-030, mean connectors must have the appropriate plating and materials to withstand salt-spray, humidity and industrial gas tests.

Technical Characteristics

Materials and Platings

Frame	Soft steel (Zinc coated)
Side flange	Polycarbonate
Insulator	Polycarbonate
Pin & socket body	Brass (Au/Ni plated)
Socket wires	Copper alloy (Au/Ni plated)
Floating eyelets	Brass (Ni plated)

Environmental & Mechanical

Temperature range	-40° C to +100° C
Fire classification	Level 2 following NF F 16-102
Salt spray test	96 hours
Acid withstanding	Following NF F 61-032 par. 11.4.6
Vibration withstanding	5g / 25 to 250 Hz
Insulator mechanical resistance	1000 N

Electrical

Contact	Ø 1.50	Ø 2.50	Ø 3.50
Creepage distance	1.85 mm	2.25 mm	4.05 mm
Clearance distance	1.25 mm	3.40 mm	5.40 mm
Working current	8 A	16 A	25 A
Insulation resistance	≥ 5.10 ³ MΩ		
Contact resistance	≤ 2.50 mΩ	≤ 1.00 mΩ	≤ 0.80 mΩ
Dielectric withstanding voltage	1500 Vrms	2000 Vrms	3000 Vrms
Voltage rating	110 V	220 V	220 V
Contact retention	40 N	50 N	70 N
Maxi male contact mass	1.10 g	2.90 g	4.90 g
Maxi female contact mass	0.70 g	1.60 g	2.70 g
IF/SF* (max value)	1.60 N	9.00 N	10.00 N
Coaxial contact	Ø 3.65		
Nominal impedance	50 Ω		
Frequency range	1.5 Hz		
RF transmission loss	0.05db at 1 HHZ - 0.06db at 1.5 GHz		

*IF/SF: insertion and separation force according to NF F 61-032

Antenna cable assembly receptacle connector

Cable & contact technical characteristics

Impedance	
Impedance	50 Ω

Cable 1/4' mechanical characteristics	
Zero halogen	
External diameter	6.40 mm
Static bending radius	25 mm mini
Dynamic bending radius	45 mm mini
Max pull force	500 N
α @ 1500 MHz	24db/100m

Transmissions losses	1.0 GHz	1.5 GHz
Hypertac coaxial contact	0.05db	0.06db
Coaxial cable	19db/100m	24db/100m
TNC contact	-	0.06db
N contact	0.05db	-

Cable assembly transmission loss: versus length		
Length	1.0 GHz	1.5 GHz
0.25m	0.15db	0.18db
0.50m	0.2db	0.24db
0.75m	0.25db	0.30db
1m	0.29db	0.36db
1.25m	0.34db	0.42db
1.50m	0.39db	0.48db
1.75m	0.44db	0.54db
2m	0.48db	0.60db
2.25m	0.53db	0.66db
2.50m	0.58db	0.72db
2.75m	0.63db	0.78db
3m	0.67db	0.84db
3.25m	0.72db	0.90db
3.50m	0.77db	0.96db
3.75m	0.82db	1.02db
4m	0.86db	1.08db
4.25m	0.91db	1.14db
4.50m	0.96db	1.20db
4.75m	1.01db	1.26db
5m	1.05db	1.32db

LHT Series

With plate inserts for safe wire protection

Technical Characteristics

Electrical

Contact Ø	1.50 mm
Creepage distance	1.85 mm
Clearance distance	≈ 1.25 mm
Connector current rating	8 A @ 50°C
Insulation resistance	≥ 5 x 10 ³ MΩ
Contact resistance	≤ 2.50 mΩ
Dielectric withstanding voltage	1500 Vrms
Voltage rating	110 V
Contact retention	40 N
Floating eyelets	Brass (Ni plated)

Environmental

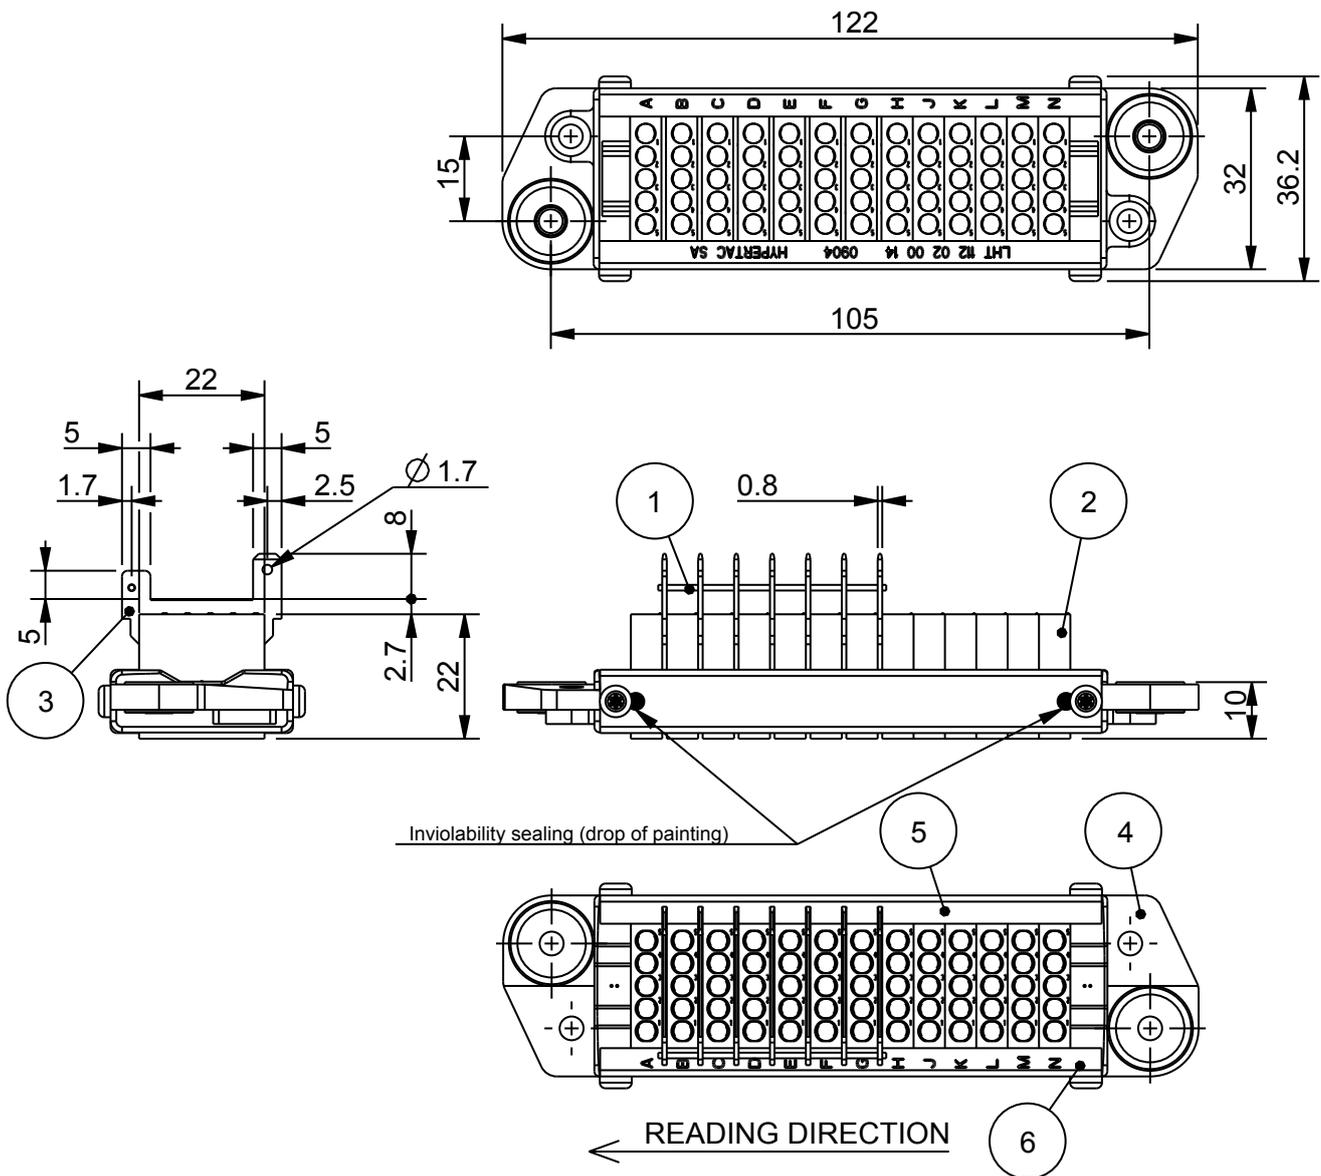

Temperature range	-40 to +100°C
Life cycles	> 500
Fire classification	Exigence 2 following NFF 16-102
Salt spray test	96 hours
Acid withstanding	Following NFF 61-032 par. 11.4.6
Vibration withstanding	5 g / 25 to 250 Hz
Insulator mechanical resistance	1000 N
Max torque for auto threading screws	75 Ncm

Plug and Receptacle Dimensions

Connectors equipped with 13 ZHA modules and 7 plate inserts

Receptacle

Part number: LHT 112 02 00 14

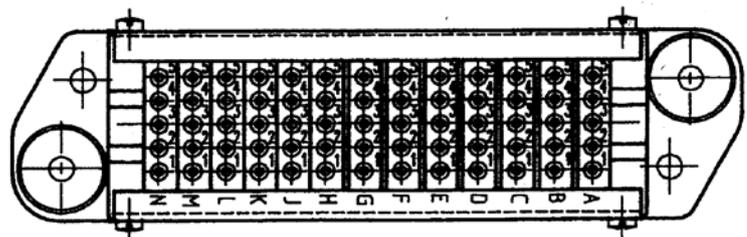

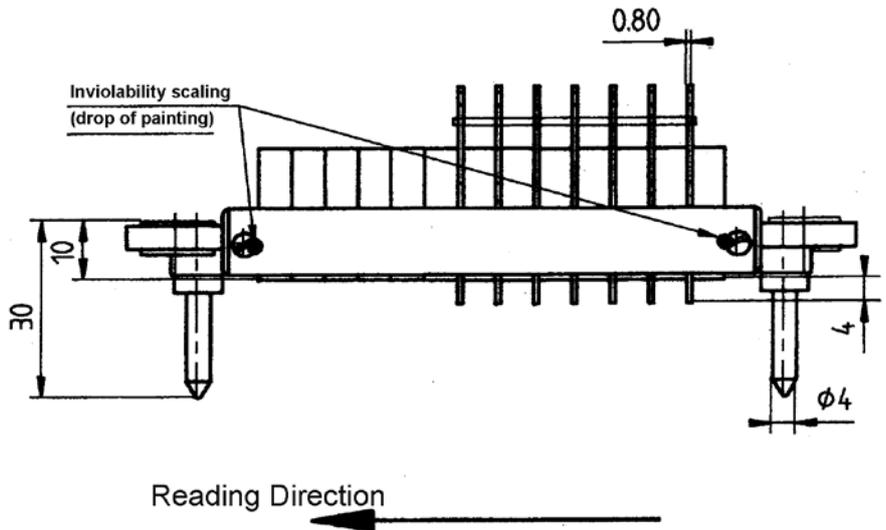

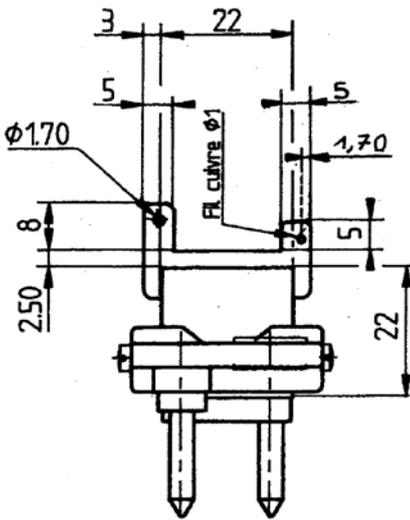

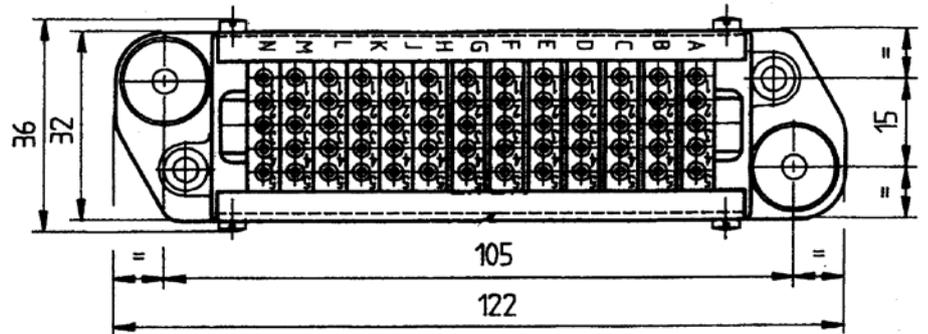

Number	Part descriptions
1	Copper wire Ø 1mm
2	Module L/ZHA
3	Female plate insert
4	Tailpiece
5	Rail
6	Labeled rail

Note: Signal contacts must be ordered separately see page 7
Dimensions are in mm

Plug

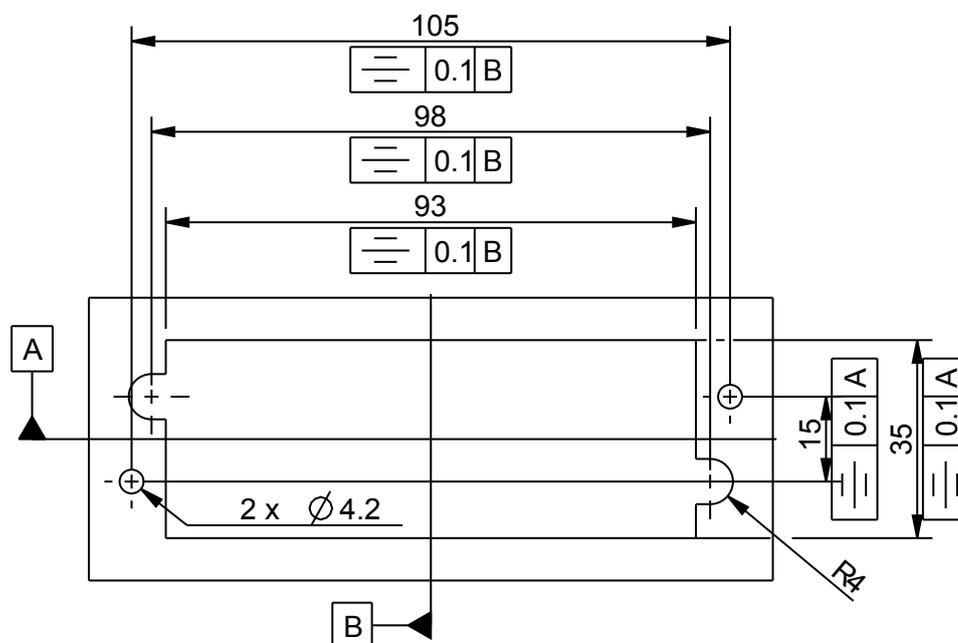

Part number: LHT 111 01 00 14

Note: Signal contacts must be ordered separately see page 7
Dimensions are in mm
