Easydic Series Shaft Incremental Encoder EB28

Application

Small economical shaft encoder EB28 is widely used in light industries where installation dimension of sensors is required. The resolution up to 600, miniature size, light weight and high precision could fully meet controlling requirements of modern light industries. The variable shaft lengths make it applicable in a wide variety of industrial environments. It's one of the most recommended choices in consideration of performance and cost.

Characteristics

- Flexible coupling connection avoids damage to the encoder
- Stainless steel shaft $\Phi 4$, $\Phi 5$ ensures high stability and protection
- Metal housing for shock resistance
- Protection class IP50
- Reverse connection protection
- Short circuit protection
- Cable output, waterproof end rubber
